

MERITOR™

Introducing Europe's widest range of UNECE R90 approved Drum Brake Linings for European Commercial Vehicles – in the Meritor brand from ArvinMeritor

ArvinMeritor's worldwide manufacturing facilities and position in the automotive business give it the strength and ability, more than any other single supplier, to determine globally the most suited friction materials for heavy vehicle applications

For the professional distributors and commercial vehicle operators it makes sense to supply and fit Meritor Brake Linings because:

Meritor are experts in brake design – the world's number one manufacturer of commercial vehicle drum brakes

Over 15 million Lucas, Rockwell and ROR drum brakes are currently "in service" in Europe and include the famous names: SAC 'Z' Cam, StopMaster and CamMaster - Meritor is the Vehicle Manufacturers' preferred choice of drum brake supplier in Europe

Meritor Brake Linings cover a comprehensive range of truck, trailer and bus applications. These friction materials are exclusive to Meritor and "hard-marked" with the Meritor brand and the relevant material identification, and are derived from the original equipment formulations to achieve the UNECE R90 regulations.

ArvinMeritor™

Meritor Brake Linings with UNECE R90 approval

All Meritor Brake Linings are asbestos free formulations and contain minimal “heavy metal” levels in compliance with the European environmental regulations.

Meritor Brake Linings are supplied in axle sets, appropriately labeled, complete with the necessary fitting instructions and information, and in tamper proof packaging conforming to the UNECE R90 regulations.

The result is a range of friction materials that can be confidently recommended to fit any commercial vehicle and the quality is guaranteed. The chart below gives details of the Meritor range of UNECE R90 approved Drum Brake Linings.
